2025GENERAL SCATALOG

TOTO

Life Anew

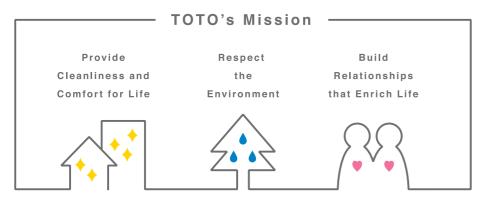

To create a culture of comfortable, healthy living.

Since our founding, we have continuously pursued innovations that offer greater wellness and comfort to daily life.

Honoring the trust that our customers and society place in us TOTO remains dedicated to delivering products that offer inclusive functionality and respect for the environment.

We embrace these values every day to create a future that surpasses all expectations.

To ensure we secure and retain the trust of customers and society as a whole, we have formulated a mission with three key elements.

We will implement our Global Environmental Vision to support the mission.

Global Themes Water, Earth & a better Tomorrow At TOTO, we're committed to improving life and the environment for a thriving future. Our production processes and products save water (င၀}and energy, while reducing impact on the enviro We provide cleanliness and comfort while building relationships that enrich life Relationship Water, Earth & a better Tomorrow All our group companies are dedicated to building 202 a healthier and more sustainable tomorrow.

()

Understated Presence

Our wish is to provide, as an integral part of everyday life, enrichment to every person. Our goal is to design products with integrity and longevity, to which people form an attachment over time.

Weaving together spaces that are beautiful and comfortable, and experiences that are pleasant.

This is the TOTO design.

The three elements that bring the TOTO Design Philosophy to life.

Design Elements

Gentle to people

- A part of everyday life
- Offers peace of mind
- Gentle to the human body

Comfortable

- Harmonizes with space
- Pleasant interface between people and objects
- Beautiful appliance

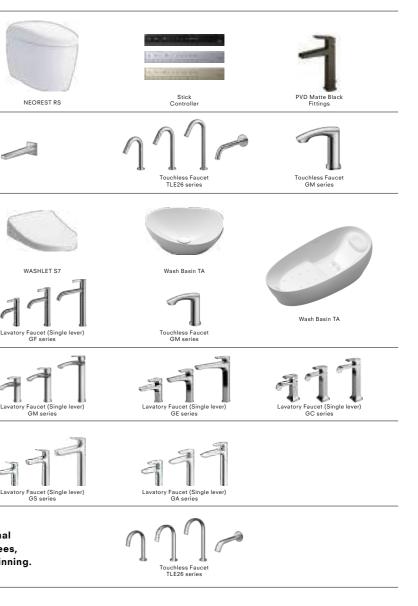

Sincere on Beauty

- Users find it pleasurable
- Retains beauty over time
- Creating a sustainable future

Wall Hung Urinal with Built-in Sensor USWN902

An intenrnationally renowned design award since 1955. Held at Design Zentrum Nordrhein Westfalen in Essen, Germany. Products that have been strictly examined and recognized by design experts against standards of innovativeness, functionality, quality, and so forth.

Hosted by American Chicago Athenaeon architectural design and European architecture Design City Research Center in Ireland. A global environmental award that began in 2009 with the aim of reforming awareness through

CLEAN TECHNOLOGY

Ensuring lasting cleanliness for your peace of mind

CLEAN TECHNOLOGY

EWATER+

WASHES THE TOILET BOWL, WHERE WASTE TENDS TO ACCUMULATE AND PRODUCE STAINS THAT CAN BECOME PERMENANT.

Using no chemicals or cleaning agents, EWATER+ leaves microscopic waste no place to hide and provides everyday peace of mind.

Without EWATER+

How EWATER+ Cleans

PREMIST, a fine mist of water is sprayed inside the toilet

Since waste is less able to adhere to a wet surface, it is more easily washed away

Before use

ightarrow During use –

Generated from tap water

Uses no detergents or chemicals

Suppresses the accumulation of waste on the toilet bowl. Electrolyzed water reduces waste and dirt you can't see.

With EWATER+

EWATER+ is applied to wash the wand and toilet bowl and remove waste

EWATER+ automatically sprayed 8 hours after the last use

 \rightarrow After use \longrightarrow During standby

Reverts to normal water with time

FITTINGS & SHOWERS

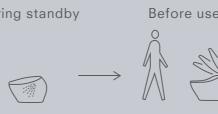

Suppresses the accumulation of waste on the wand. The wand washes itself inside and out with EWATER+ to maintain hygienic conditions.

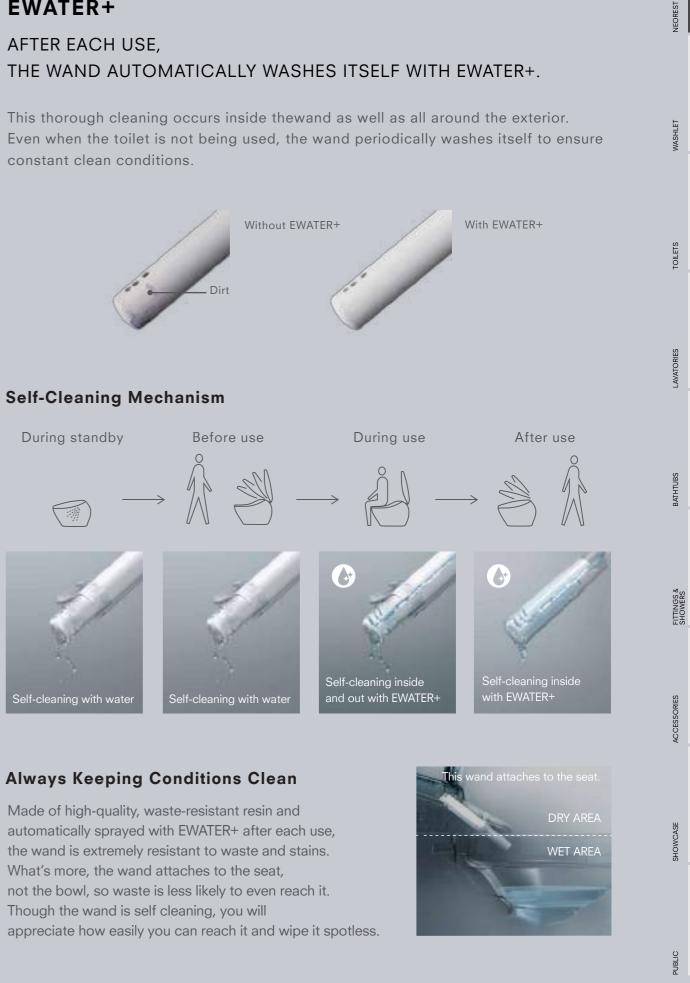

EWATER+

AFTER EACH USE,

constant clean conditions.

Always Keeping Conditions Clean

the wand is extremely resistant to waste and stains. What's more, the wand attaches to the seat, not the bowl, so waste is less likely to even reach it. Though the wand is self cleaning, you will

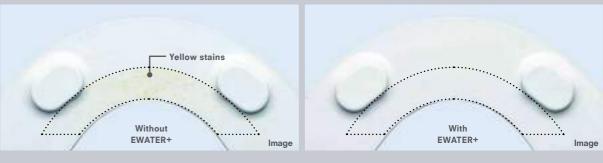

EWATER+ suppresses hard-to-see waste underneath the toilet seat.

EWATER+

EWATER+ IS SPRAYED ON THE EASILY FOULED FRONT SECTION OF THE BACKSIDE OF THE TOILET SEAT.

This helps suppress urine and other waste from becoming yellow stains, for long-lasting cleanliness. A quick manual spray before cleaning allows you to remove waste with a light wipe.

Survey: Evaluation of waste on the front section of the backside of the toilet seat with and without use of EWATER+ Usage conditions: A number of uses equivalent to usage for two weeks by a family of four (without cleaning) *Results vary according to usage and environmental conditions. All data collected by TOTO. The dotted lines in the figure show the area over with EWATER+ is sprayed.

How EWATER+ Cleans

PREMIST, a fine mist of water is sprayed inside the toilet

Since waste is less able to adhere to a wet surface, it is more easily washed away

Before use - \rightarrow During use

EWATER+ reaches underneath the toilet seat.

EWATER+ is sprayed throughout the toilet bowl, with large droplets covering the bowl surface and small droplets carried by air currents reaching the front section of the backside of the toilet seat

FITTINGS & SHOWERS

After you step away from the toilet, EWATER+ is sprayed in the toilet bowl and underneath the toilet seat, after which the lid automatically closes

 \rightarrow After use -

EWATER+ is automatically sprayed 8 hours after the last use

CEFIONTECT

PREMIST

Forces waste to slide down.

Ultra-smooth ceramic leaves nowhere for waste to cling.

Prevents waste from clinging.

A film of water keeps waste from clinging onto the toilet bowl.

CEFIONTECT

IS AN ULTRA SMOOTH CERAMIC GLAZE THAT COATS THE TOILET BOWL.

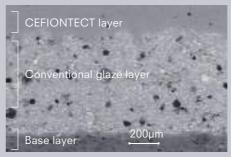

Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

Eliminating the microscopic gaps where waste hides

Conventional ceramic may appear perfectly smooth to the eye, but it has gaps where waste particles can hide. At just one millionth of a millimeter, CEFIONTECT's surface ridges are much tinier than waste particles.

What makes CEFIONTECT so durable?

A glass layer is burned over the conventional glaze layer, making CEFIONTECT an extremely durable material.

CEFIONTECT toilet micrograph *1Qm=0.001mm

PREMIST

To ensure waste washes away easily, a film of water keeps waste from clinging onto the toilet bowl.

PREMIST automatically sprays water over the surface of the inner toilet bowl before every use. Due to the ceramic's hydrophilic nature, waste washes away more easily.

Water has a strong affinity to CEFIONTECT

Hydrophilic describes organisms and materials that attract water. CEFIONTECT is hydrophilic. Water spreads easily over the toilet bowl, so waste particles easily wash away.

FITTINGS & SHOWERS

Swirls and ejects waste entirely

360° cleaning power reaches every spot using less water.

TORNADO FLUSH

NOT ONLY CLEANS MORE EFFECTIVELY, IT DOES SO QUIETLY USING LESS WATER.

Powerful streams of water merge and swirl 360 degrees, washing every spot inside the RIMLESS toilet bowl.

Powerful washing where waste can easily accumulate

TORNADO FLUSH's dynamic waterjet discharges from near the front of the toilet bowl, travels in a narrow channel along a hairpin curve, and with sustained water pressure thoroughly cleanses the areas where waste accumulates most easily to wash the entire bowl clean. The exquisitely-designed, high-quality ceramic bowl makes this innovative design possible.

The RIMLESS design not only leaves no place for waste to hide, it also makes it much easier to clean the toilet.

Hairpin curve of water flow

FITTINGS & SHOWERS

CLEANSING TECHNOLOGY

Supporting your health and wellness with a new type of clean

The precise, pleasant, air rich stream keeps you clean. And it's always pleasantly warm.

AIR-IN WONDER-WAVE

AIR RICH WATER DROPLETS TO PRODUCE A MORE COMFORTABLE WASHING SENSATION AND DELIVER MORE THOROUGH CLEANSING WITH LESS WATER CONSUMPTION.

Even more, water is warmed instantly as needed, so you need never worry about running out of warm water.

How AIR-IN WONDER-WAVE works

AIR-IN WONDER-WAVE technology is a precise and pleasant air-rich stream that keeps you clean. As water droplets are fired at different speeds, small droplets collide with larger ones, combining and expanding as they fill with more air. The injection of air enlarges the water droplets by approximately 30%

Select the type of cleansing you desire.

•	Ψ.,	4 =	- +	• •	$\in \checkmark \lor$

NEOREST® NX2, NX1, LE, AH and RH Remote Control

REAR CLEANSING

Large air-filled water droplets pr ovide a comfortable sensation and complete cleansing with minimal water use.

SOFT REAR CLEANSING

Plentiful showers of water provide a gentle sensation and complete cleansing over a wide area.

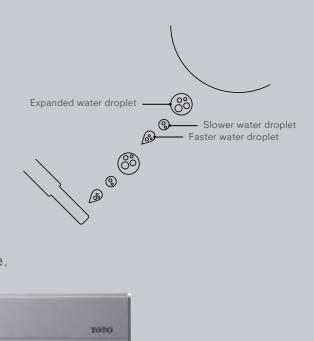

FRONT CLEANSING

A gentle dispersion of large water droplets ensures intimate cleansing in the most comforting way.

WIDE FRONT CLEANSING \cdots

Showers of small water drioplets reach a wide area, ensuring a gentle sensation for sensitive skin.

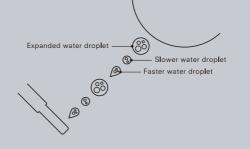

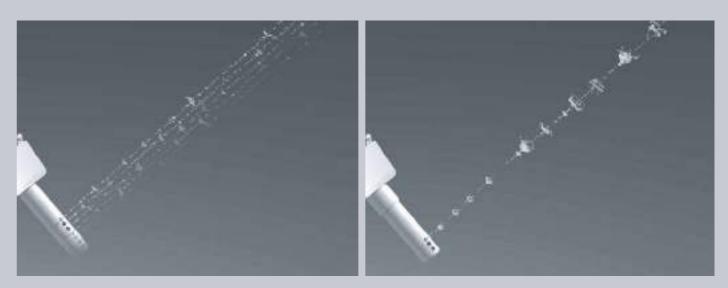

FITTINGS & SHOWERS

CLEANSING SPRAY PATTERNS

HOW AIR-IN WONDER-WAVE WORK

As water is fired at different speeds, small droplets collide with larger ones, combing and expanding as the droplets fill with more air. The injection of air englarges water droplet by around 30%

Oscillating Cleansing The back-and-forth movement of the wand ensures thorough cleansing of the entire area.

يپ

Large air-filled water droplets offer complete cleansing and a comfortable sensation with minimal water use.

Plentiful shower of water gives a gentle sensation for complete cleansing over a wider area.

Gentle dispersion of large water droplets ensure intimate cleansing in the most comforting way

Shower of small water droplets reaches a wider area giving a gentle coddling sensation to sensitive skin.

< ►

Wand Position Adjustment You can easily set the wand position according to your preference.

Pulsating Cleansing Rhythmically pulsating stream of cleansing warm water.

Wand Pressure Adjustment
Select from five levels of water pressure

FITTINGS & SHOWERS

UBLIC

COMFORT TECHNOLOGY

COMFORT FECHNOLOGY

Pursuing comfort to enrich everyday living

COMFORT TECHNOLOGY

COMFORT TECHNOLOGY

For greater performance and hygiene in the bathroom

AUTO OPEN / CLOSE LID

Eliminating the need to touch the toilet surfaces, the lid automatically opens and closes when the toilet is approached and departed.

The moment you approach the toilet, the seat begins to rapidly warm up to a comfortable

temperature.

AUTO FLUSH \bigcirc

No need to touch buttons or the handle and never worry about someone forgetting to flush — it's automatic after each use.

046

SOFT LIGHT

Subdued lighting switches on when the toilet is approached, so users don't have to be exposed to bright bathroom lights at night.

DEODORIZER

Highly-effective deodorizing automatically takes place inside the toilet bowl both during and immediately after use, eliminating unwanted odors.

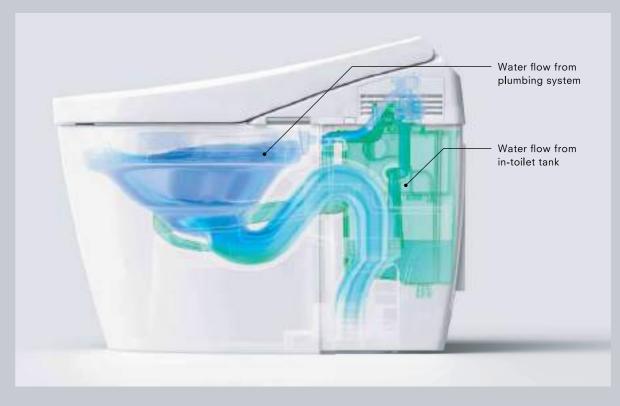

Enjoy the ease and comfort of the temperature-adjustable warm-air dryer.

SUSTAINABILITY

HYBRID ECOLOGY SYSTEM combines two innovative water streams—one from the plumbing system and one from a small tank inside the toilet—to maximize flushing efficiency. Using minimal water, HYBRID ECOLOGY SYSTEM is so effective at removing waste that a second flush is never required. What's more, the flushing power remains strong regardless of how high up in a building the toilet is located.

CLEAN SYNERGY means eco-friendly

CLEAN SYNERGY technologies offer a sustainable way to maintain sanitary conditions inside your toilet. Since waste does not accumulate and create stains, there is less need for manual cleaning with detergents.

Ultra-powerful water conservation. Flushes waste completely every time — no matter where the toilet is located.

HYBRID ECOLOGY SYSTEM

Sustainable cleaning

WASHLET sprays the non-porous ceramic bowl with EWATER+, to help prevent the buildup of microscopic waste. Free of chemicals and cleaning agents, EWATER+ returns to the water cycle as pure H_2O .

FITTINGS & SHOWERS

washleт

Why wipe, when you wash? Discover the secret behind why you can't go back after using it once.

INSTANTLY WARMS THE WATER FOR YOUR **PLEASANT FEEL AND CLEANLINESS**

O

1) The "rich flow of water droplets containing air" creates a "strong and thorough" cleanse.

2) "Water is warmed instantly" to give you the "comfort of warm water anytime, for as long as you like."

3) Featuring "a clean design without a water tank."

4) It also "saves water and electricity."

CLEANSING **SPRAY PATTERNS**

• • •
• •

REAR CLEANSING

Large air-filled water droplets offer complete cleansing and a comfortable sensation with minimal water use.

REAR SOFT CLEANSING

Plentiful shower of water gives a gentle sensation for complete cleansing over a wider area.

WIDE CLEANSING Gentle dispersion of large water droplets ensure intimate cleansing in the most comforting way.

WIDE FRONT CLEANSING

Shower of small water droplets reaches a wider area giving a gentle coddling sensation to sensitive skin.

OSCILLATING CLEANSING

WAND POSITION ADJUSTMENT

A variety of washing functions that cater to the convenience and mood of each individual

FITTINGS & SHOWERS

Toilet and WASHLET combinations that are beautiful from any angle.

Making it possible to pursue beautiful design, WASHLET+is a new series of toilet and WASHLET combinations that use a TOTO proprietary system to conceal WASHLET water supply hose and electrical cord inside.

The gap between toilet and WASHLET is minimized for better balance.

The clean line of the toilet bowl and lid creates a seamless design that fits any space.

STAND BY

SUPPRESSES the accumulation of Waste on BOWL

EWATER+ washes the wand and toilet bowl where waste tend to accumulate and produce stains that can become permanent. Using no chemicals or cleaning agents, EWATER+ provides peace of mind every day that microscopic stains has no place to hide.

Survey: Study the effectiveness of EWATER+ by comparing the state of cleanliness of toilets that receive no cleaning versus toilets that are self-cleaned with EWATER+. No additional cleaning was allowed. Survey period: One month (Feb. - Mar. 2017). Subjects: Families of four. *Results vary according to usage and environmental conditions. All data collected by TOTO.

How EWATER + cleans

Before use

PREMIST, a fine mist of

inside the toilet

ordinary water is sprayed

Since waste is less able to adhere to a wet surface, it is more easily washed away

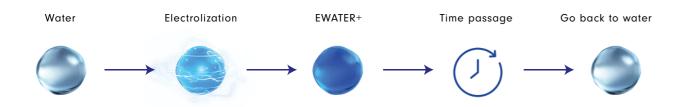

WHAT IS EWATER+

EWATER+ is water containing hypochlorous acid that is used for cleaning and other purposes.

Hypochlorous acid is effective in suppressing the growth of bacteria.

Chloride ions contained in water are electrolyzed to create water that contains hypochlorous acid.

After use

EWATER+ is applied to wash the wand and toilet bowl and remove waste

During standby

EWATER+ is automatically sprayed 8 hours after the last use

OILETS

FITTINGS & SHOWERS

CLEANLINESS CLEAN SYNERGY

SUPPRESSES the accumulation of Waste on WAND

Before and after each use, the wand automatically washes itself with EWATER + . This thorough cleaning occurs inside the wand as well as all around the exterior. Even when the toilet is not being used, the wand periodically cleans itself to ensure constant hygienic conditions.

Survey: Study the effectiveness of EWATER+ by comparing the state of cleanliness of wands self-cleaned with EWATER+ versus those that are not. No additional cleaning was allowed. Survey period: Two months (Sep. - Oct. 2017). Subjects: Families of four. *Results vary according to usage, environmental conditions, and product type. All data collected by TOTO Antibacterial self-cleaning inside the mechanism, too Before use \Rightarrow During use \Rightarrow After use **During standby**

Self-cleans with water

Self-cleans with water

Self-cleanses inside and out with EWATER+

Always Keeping Conditions Clean

Made of high-quality waste-resistant resin and automatically sprayed with EWATER+ after each use, the wand is extremely resistant to waste and stains. What's more, the wand attaches to the seat, not the bowl, so waste is less likely to even reach it. Though the wand is self-cleaning, you will appreciate how easily you can reach it and wipe it spotless.

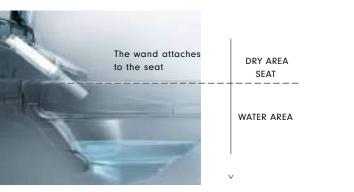

Self-cleanses inside with EWATER+

CLEAN MATERIAL

High-quality resin repels waste and dirt and resists staining, keeping surfaces clean.

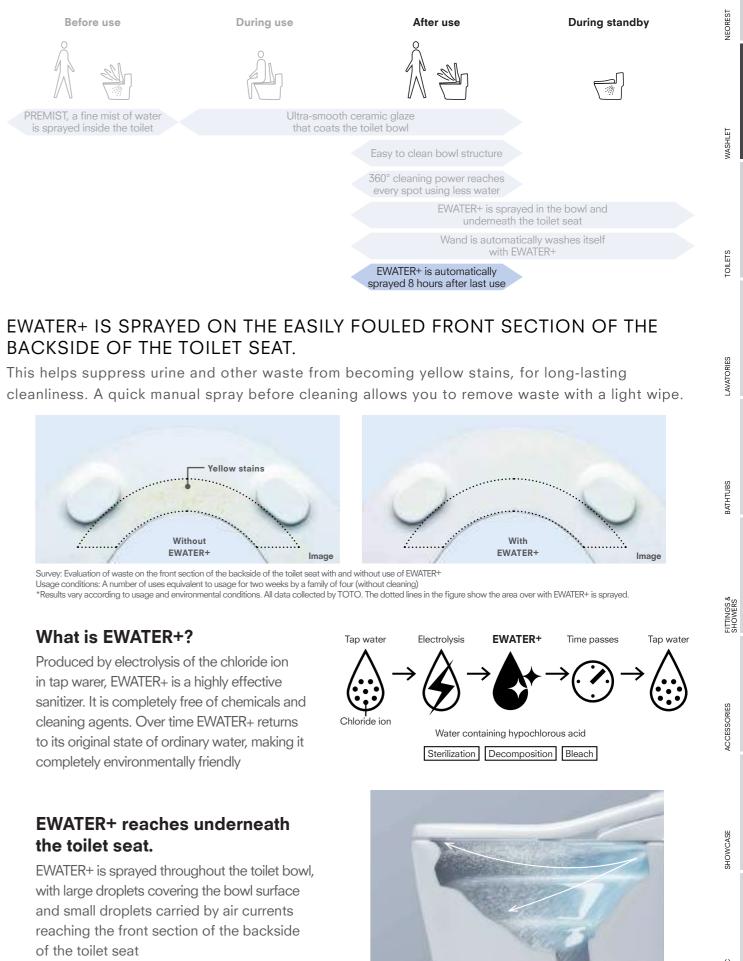

FITTINGS & SHOWERS

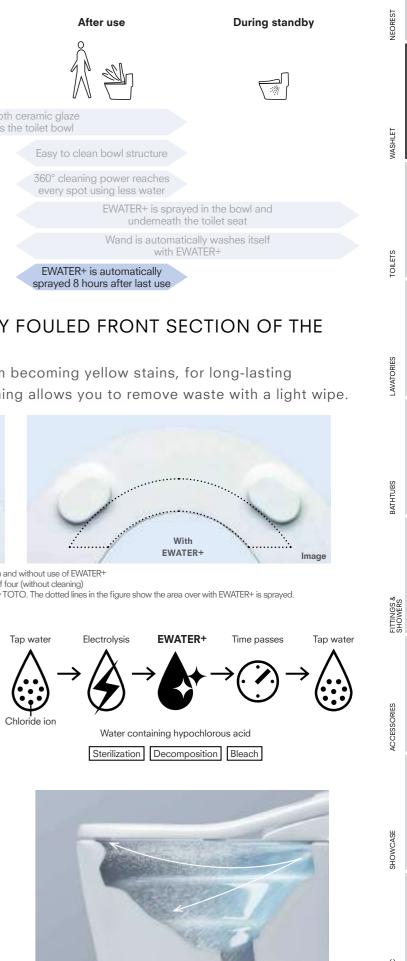

Before use

BACKSIDE OF THE TOILET SEAT.

FORCES Waste to **SLIDE DOWN**

Ultra-smooth ceramic leaves nowhere for waste to cling.

CEFIONTECT is an ultra-smooth ceramic glaze that coats the toilet bowl. Its microscopic surface ridges are far smaller than waste particles, leaving no place for waste to gain a foothold. Extremely durable, CEFIONTECT is designed for enduring beauty and cleanliness.

PREVENTS Waste from CLINGING

To ensure waste washes away easily, a film of water keeps waste from clinging to the toilet bowl.

PREMIST automatically sprays water over the surface of the inner toilet bowl before every use. Due to the ceramic's hydrophilic nature, waste washes away more easily.

spot inside the RIMLESS toilet bowl.

BENEFITS & TECHNOLOGIES

LAVATORIES

Faucet / Lavatory Planning

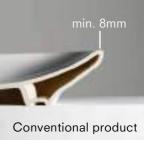

LINEARCERAM's accurate design harmonizes with any space. Sophisticated and inviting to use, LINEARCERAM is a new paradigm in bathroom aesthetics.

TOTO has developed a new material "LINEARCERAM" that is stronger than general fire clay by combining unique ingredients. This gave us more freedom of design and made a highly accurate design possible.

We created a cutting-edge design that is extremely thin, emphasizes its linear contours and smoothness.

CEFIONTECT clean

LINEARCERAM features TOTO's proprietary technology for preventing the adhesion of dirt and ensuring easy cleaning. CEFIONTECT has superior durability for long term use.

Immersed in the meditative moment of relaxation.

THE POSTURE OF AN ASTRONAUT **RESTING IN SPACE**

joints and encouraging ultimate relaxation.

Ankle joint angle

p point angle

ZERO DIMENSION bathing brings freedom from gravity, releasing stress on

(nee joint angle 138(±7)deg

> Research has shown that the ZERO DIMENSION bathing posture reduces activity in the part of the brain that houses the language function. This is the reason ZERO DIMENSION bathing feels calming and relaxing.

After more than a decade of research on body positioning, bathing and neurological relaxation, TOTO developed the Flotation Tub. Its design simulates zero gravity by offering bathers the experience of total weightlessness. By releasing the bather from the bonds of gravity to float in a tension-free state, deep muscle relaxation occurs that calms the body, mind and spirit,

creating a sanctuary from the physical and mental fatigue that today's world brings.

A STATE OF TRANQUILITY

ADVANCED TECHNOLOGY ENCOURAGES RELAXATION

Exclusive features that make every bathing experience a luxurious occasion.

NECK BATH

With variable pillow positions ensuring stability, people of all body shapes can enjoy the warmth of the bath from above the shoulders to the neck.

CONTROLLER

The electrostatic controller is operated by the slightest touch.

HYDROHANDS

Deeply stimulating water massage gives the feeling of real hands kneading tired muscles.

LED LIGHTING

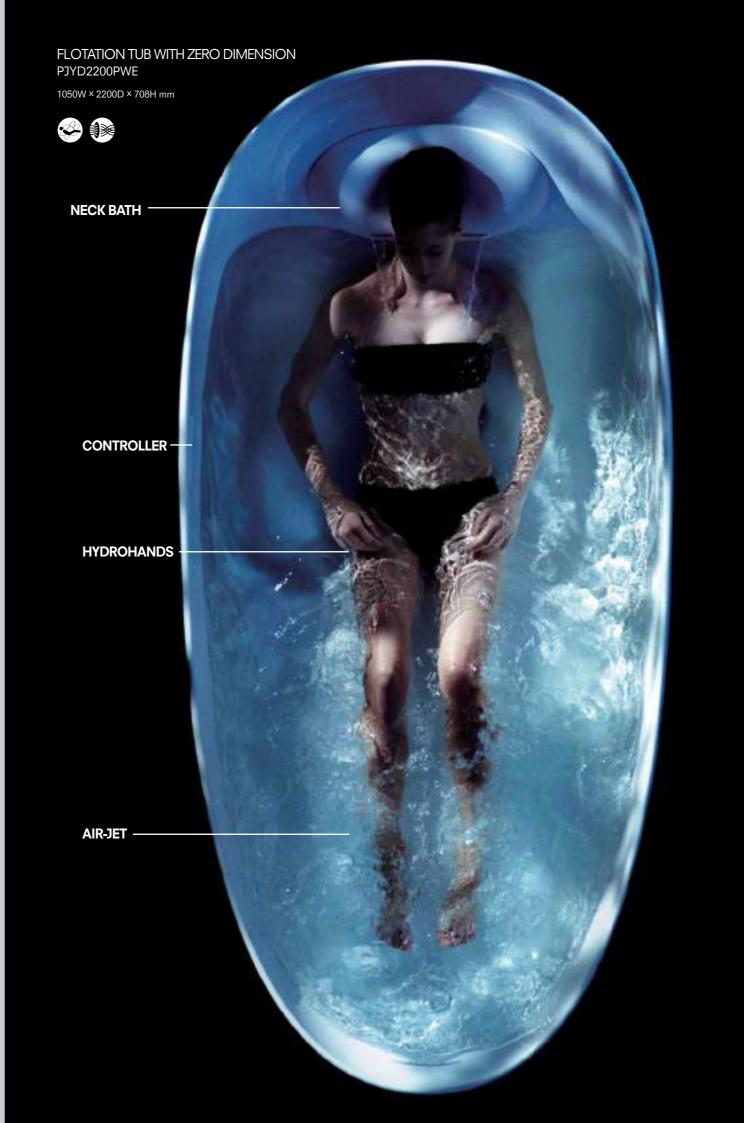

In the outer perimeter of the tub's base, LED lighting supplies a dream-like ambience.

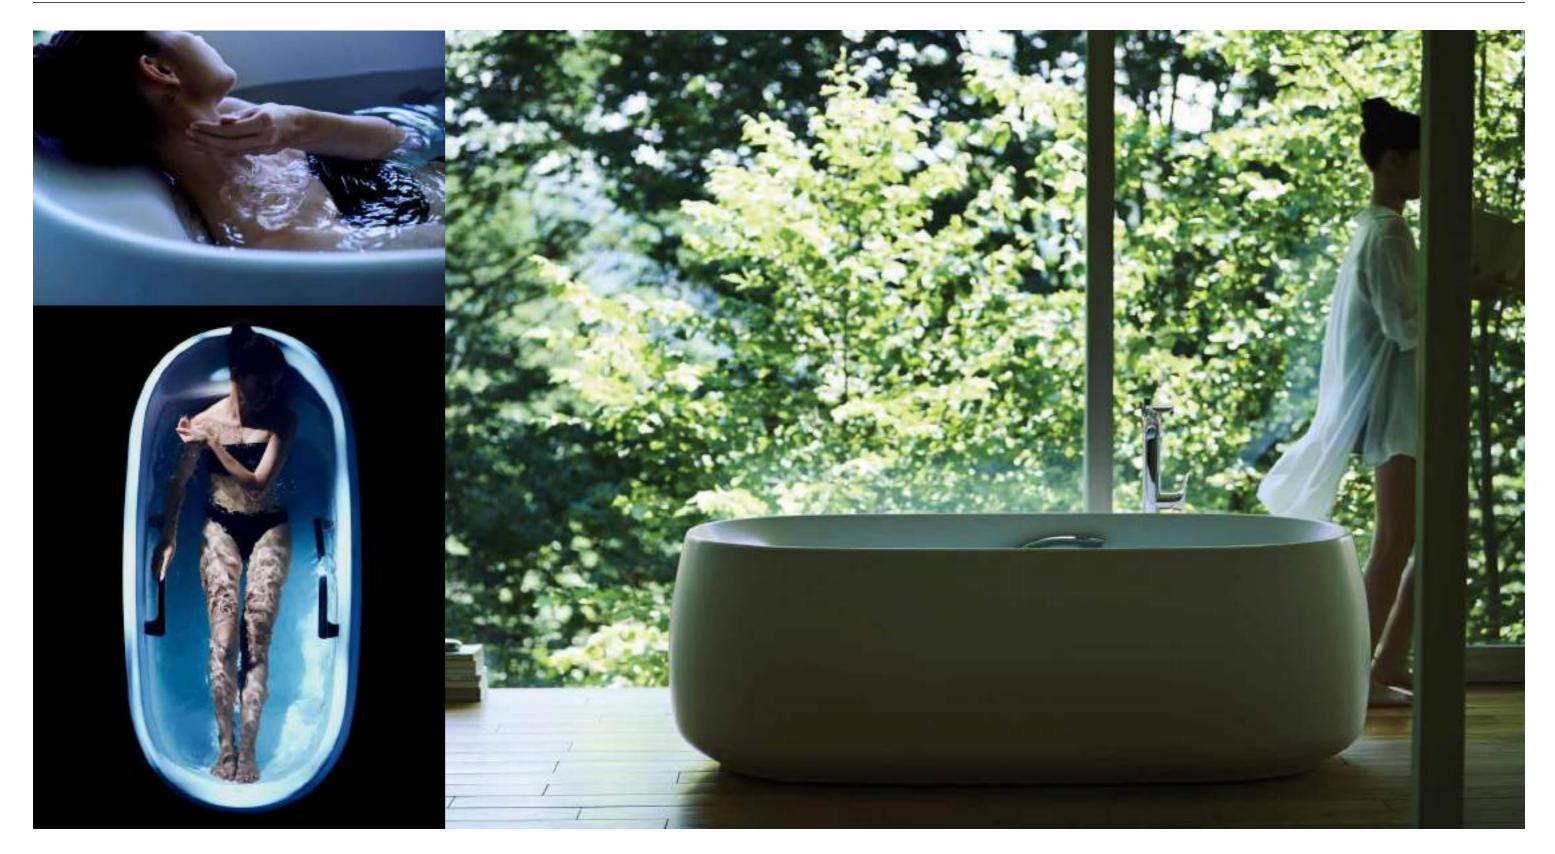

AIR-JET

Fluctuating streams of air bubbles rise from below and envelop the body with a soothing sensation.

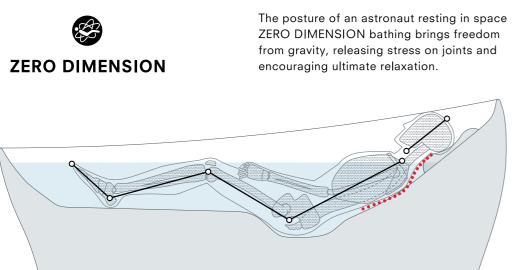

Nestled in comfort, feel your body and mind release into a state of tranquility.

The weight of the head releases onto the headrest, the body receives the sensation of a comforting embrace. The natural S-curve of the spine is maintained all along the neck and down the back, encouraging deep release. This position provides a deep sensation of ease and tranquility. It is a bathing experience that brings relaxation beyond expectations.

RECLINE COMFORT

Bathing position comparison

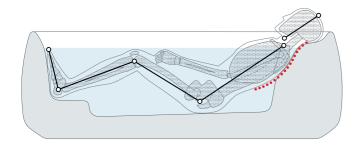

PJYD2200PWE w/o Hand Grip TBP01301A / TBN01105B Floor Standing Bath & Shower Set

RECLINE COMFORT

The weight of the head releases onto the headrest, the body receives the sensation of a comforting embrace. The natural S-curve of the spine is maintained all along the neck and down the back, encouraging deep release. This position provides a deep sensation of ease and tranquility. It is a bathing experience that brings relaxation beyond expectations.

COLOR

CONVENTIONAL

In a conventional bathtub, the low water height and a rounded low back make complete relaxation difficult to attain. The shoulder and neck area do not receive warmth from soaking and the bathing position can feel tight and cramped.

You can choose between a high-gloss finish that looks like ceramics or a matte finish with a subdued texture.

Product lineup

FAUCET

Lightness and dignity in a natural shape for a timeless design.

harp edges, the beauty of generous curves, and the contrast of polished and hairline finishes combine in a modulated design that achieves balance of a different order. The handle, asymmetrically shaped like a small stone, is beautiful from any angle and settles in rhythmically.

FAUCET

An asymmetrical faucet handle and washbasin bowl in beautiful harmony

ith the thinness of a flower petal, the organically shaped ZA series handle matches the delicate curve of the washbasin bowl in a way that suggests a breeze or a melody, further enhancing the appeal of the design for a fresher everyday in spaces that share its natural motif.

PUBLIC

A precise, ultra-thin form delivers a tranquil, keenly framed beauty.

he smooth, flat, mirror-like surface and ultra-thin edge generate a contrast in two dimensions whose overwhelmingly delicate look – made possibly by advanced processing technology – shares a design philosophy with the square-lined, sharp-edged washbasin bowl.

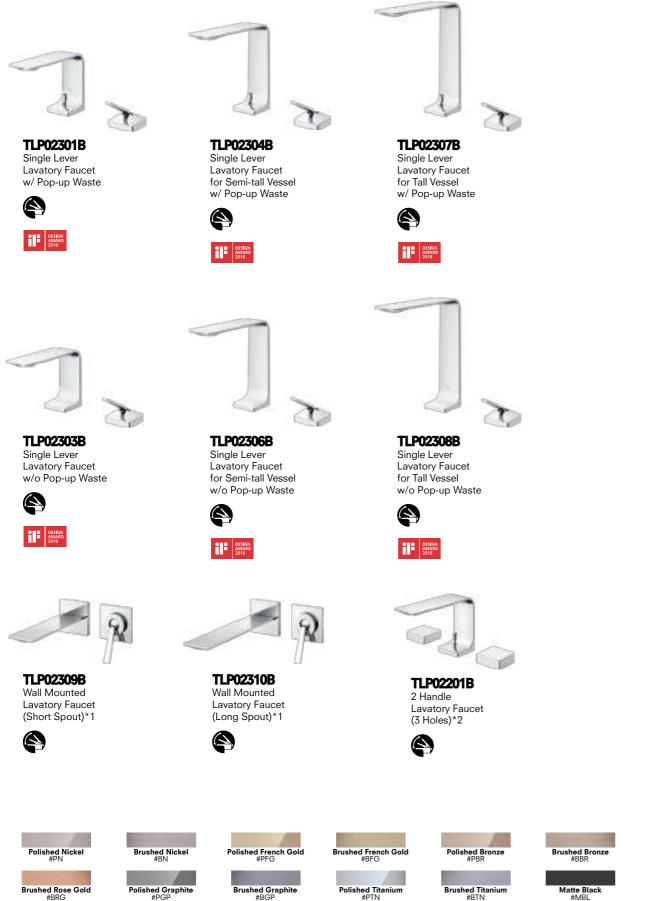

Enhancing flow and gesture, the design fits the sharp washbasin bowl.

bundant water flows like a waterfall from the horizontal spout, while the handle can be operated gracefully with a gentle pinch of the fingers. Beautifying even the flow of water and human gestures, the design resonates with the sharp, square washbasin bowl to create a richer space.

PUBLIC

The breadth and symbolism of classical design in a contemporary form.

ith the composure of an elegant serif typeface and a base shaped to reconfigure the stability at the heart of traditional architecture, we pay homage to designs that have stood the test of time while transitioning to a modern design that reflects the present day.

GC series

The two-handle design captures the rich aesthetic of an elegant hotel.

Igned along a straight line, the faucet and handles present a strikingly consistent design. The horizontal line crossing each base serves as a boundary that tightens the gaps between them. The low center of gravity adds a dignified accent to interior spaces without getting in the way.

Bold parallel arches and reflective curves in an assertive design.

S uggesting the majestic dignity of outstanding architecture, the shape combines – in the arch of its spout and a columnar body – elements seen in traditional shrine gates. Its imposing presence is further accentuated by the highlights that trace its edges.

The stately squareness and beveled edges imbue a space with dignity.

ollowing edges so gently beveled you'll want to draw your finger along them, the balanced highlights accentuate the shape of the gradually narrowing spout and the sleek silhouette of the whole.

Stunning beauty and remarkable hardness from **PVD**

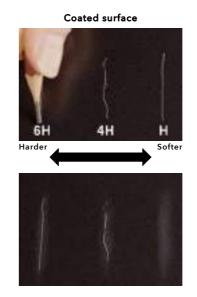

This stunning Matte Black finish adds sophistication and depth to our elegant faucet designs. Its silky sheen and delicate color gradation create a sense of luxury like no other.

Our "shot-blast processing" forms a chrome plating by physical vapor deposition (PVD) on faucet fixture surface irregularities. The result is a gorgeous Matte Black finish with a lustrous sheen and fine color nuances.

PVD finished surfaces are harder than coated surfaces.

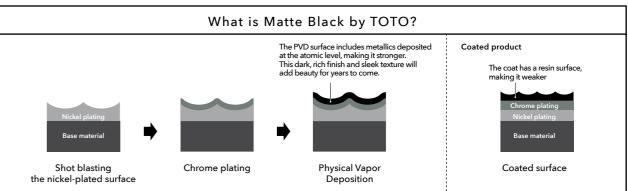

Compared to coated products, PVD products are less prone to peeling or scratches that would reveal the base material on the surface.

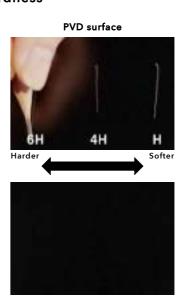

Pencil testing for surface hardness

PVD Matte Black finish won't be scratched even with a hard pencil.

Test conditions: Pencil testing(conformant with JIS K5600 5.4, ISO 15184, ASME D3363, and GB T6739) was performed on the coating/PVD in our test site.

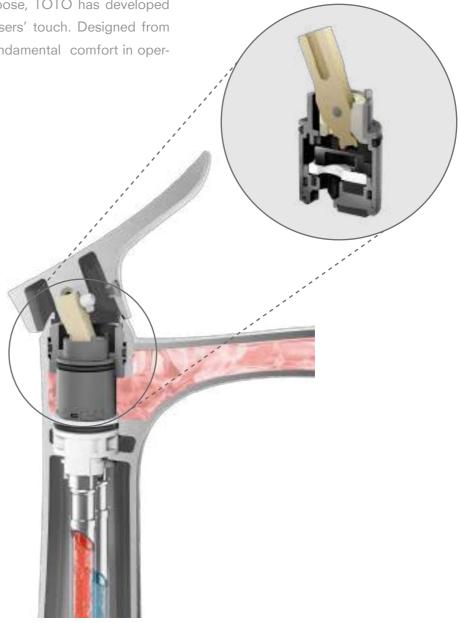

Everyday ease-of-use that is grounded in the senses.

Comfort. For TOTO, this does not simply mean comfort of movement. Ease of use, when it lasts a long time, becomes comfort in itself. For this purpose, TOTO has developed the internal valve based on users' touch. Designed from the ground up to provide a fundamental comfort in operation.

Precise flow control, exclusive to TOTO.

Our exclusive technology means new functionality. We took the core component of the valve, the ceramic disc, and customized its shape for ease of use. Compared to conventional faucets, it's easier to control water flow when just a little is required, such as when you are washing a contact lens. Because you can achieve the right amount of water flow instantly, it helps conserve water. *Adjustable flow functionality is not available on side-handle models.

FAUCET

Special coating for prolonged comfort.

The ceramic disc, a core valve component, is covered with a special DLC (Diamond Like Carbon) coating. This ensures long-lasting quality over conventional faucets that use a greased valve.

Revitalizing

Safety for the entire family

When our children start bathing on their own, Or might they burn themselves on hot fixtures? TOTO's safety features alleviate any such concerns.

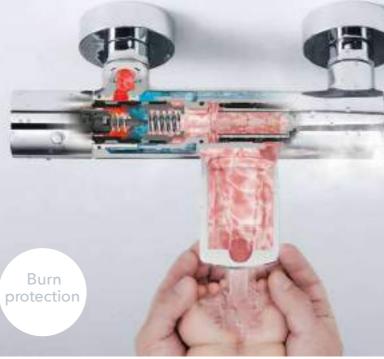

SAFETY THERMO Products

Shower Column

SAFETY THERMO

Exposed Thermostat

2.3

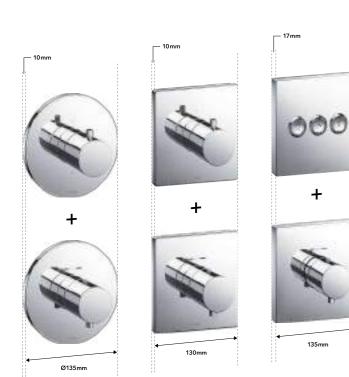

Spout

SHOWER

Prevents rapid rises in temperature for a safer bath time. A coil made of Shape-Memory Alloy (SMA Coil) reacts instantly to water temperature change, keeping the temperature from rising. SAFETY THERMO SINGLE water pressure dro By comparison with the SINGLE product, SAFETY THERMO produces a smaller range of temperature fluctuation during bathing, even when the water pressure drops due to a toilet flushing. Prevents getting too hot and is beautifully shaped for a more pleasant daily bath time. By covering the path of the hot water with a layer of cold, HEAT PROTECT is able to prevent burns when accidentally touching the fixtures.

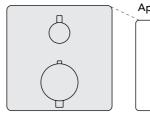

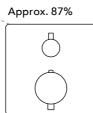

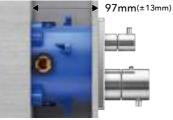

Industry-leading miniaturization. Beauty in balance.

We shrunk the unit to one of the industry's smallest. The trims are also some of the most compact. In addition, our progress towards uniform sizes mean units can be used simultaneously to create a beautiful space. We also strived to make the trim as thin as possible. A bathroom of unity and style can be yours.

lished Chrome

VALVE UNIT TBN01104B

TBN01101B | TBN01102B | TBN01103B

300

SHOWER

A compact unit offering freedom of choice for more beautiful bathrooms.

Concealed faucets liven up the bathroom. TOTO's MINI UNIT is a technology that gives you more freedom. We don't match the concealed system to each trim, instead we use a shared module. You can choose the functionality you need such as a single lever type, thermostat type or touch button type, and also make choices based on design features such as round or square fixtures

Easier to install. Less load on the frame.

A high degree of flexibility when installing the MINI UNIT is one of its most attractive features. We were able to achieve one of the industry's smallest and lightest bodies for the concealed system. It puts only a minimal load on the architectural frames and has improved manageability during installation. In order to conceal the unit, the wall only needs to be 97mm, and the system is able to absorb installation error of ±13mm.

Intuitive operations make it easy to get the showering experience you want

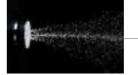

The handheld shower is equipped with a lever that is easily operated with your thumb while you hold it. Moving this lever left of right changes the water discharge mode. The body shower provides two water discharge modes. It has a form that allows a comfortable grip, with water delivery switched by rotating the main body left or right. Being able to freely switch between water discharge modes provides a pleasant bath time.

PUBLIC

Restrooms designed with people in mind.

PUBLIC

A public restroom. It's not just where you "go to the toilet". It's also a place for freshening up, touching up makeup, and much more

For many years, our approach at TOTO has always been to put the user first. Offering products that combine unique technologies and sophisticated designs, TOTO proposes restrooms that anyone can use in comfort and with peace of mind.

TOTO PUBLIC RESTROOMS

382

CLEANLINESS

Touchless Technology

any need to touch the fixture.

From the time you enter a restroom until you leave, TOTO's touchless products perform every action necessary without direct physical contact.

With many people using the restrooms in train stations, shopping centers, schools, offices and other facilities, it is of utmost importance that public restrooms are sanitary. Plumbing fixtures should have functions that can reduce the spread of coronaviruses, influenza, noroviruses, and other infectious diseases which can have a serious impact on society. TOTO restroom fixtures are equipped with touchless functions that enable people to use the toilets, then wash and dry their hands without having to come into contact with the fixtures themselves. In addition to ensuring that restrooms can be used sanitarily and comfortably, the risk of spreading infectious diseases is greatly reduced. TOTO goes beyond merely 'sanitary' to achieve an extraordinarily high level of hygiene for restroom fixtures.

Every action is performed hands-free.

Automatic flushing toilet

Touchless soap dispense

Bacteria and viruses may be present on restroom fixtures used by large number of people. Touching the fixtures can transfer the bacteria or viruses to your hands. Our touchless faucets let you easily wash your hands without

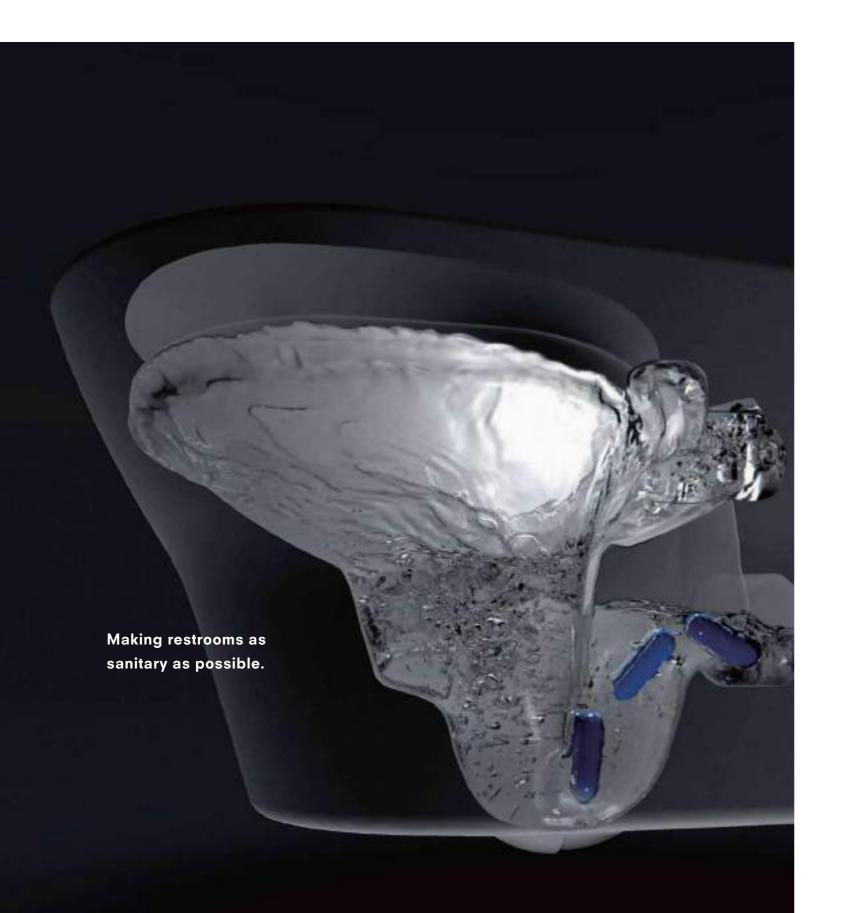

Touchless faucet

Automatic hand dryer

CLEANLINESS

Clean Technology

Advanced techologies to keep toilets fresh and clean.

Ever since TOTO was founded more than 100 years ago, we have been developing and manufacturing sanitary, hygienic ceramic products. TOTO products feature surfaces that are easy-to-clean, resist stains, and prevent adherence of waste. With this single-minded goal, TOTO has developed a long list of innovative technologies. Example include the extraordinarily smooth CEFIONTECT nano-technology glaze, which prevents waste matter from adhering, and TORNADO FLUSH, which delivers powerful flushing with minimal water, all so that everyone can comfortably use the restroom with peace of mind.

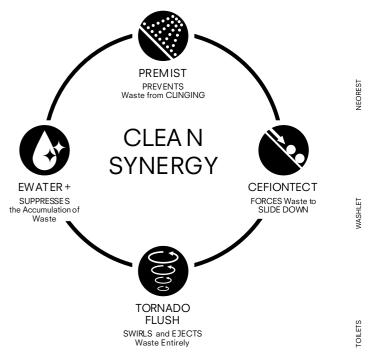

Advanced technologies combine to keep toilets fresh and clean.

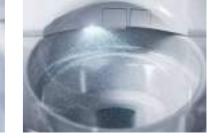

CEFIONTECT

TORNADO FLUSH

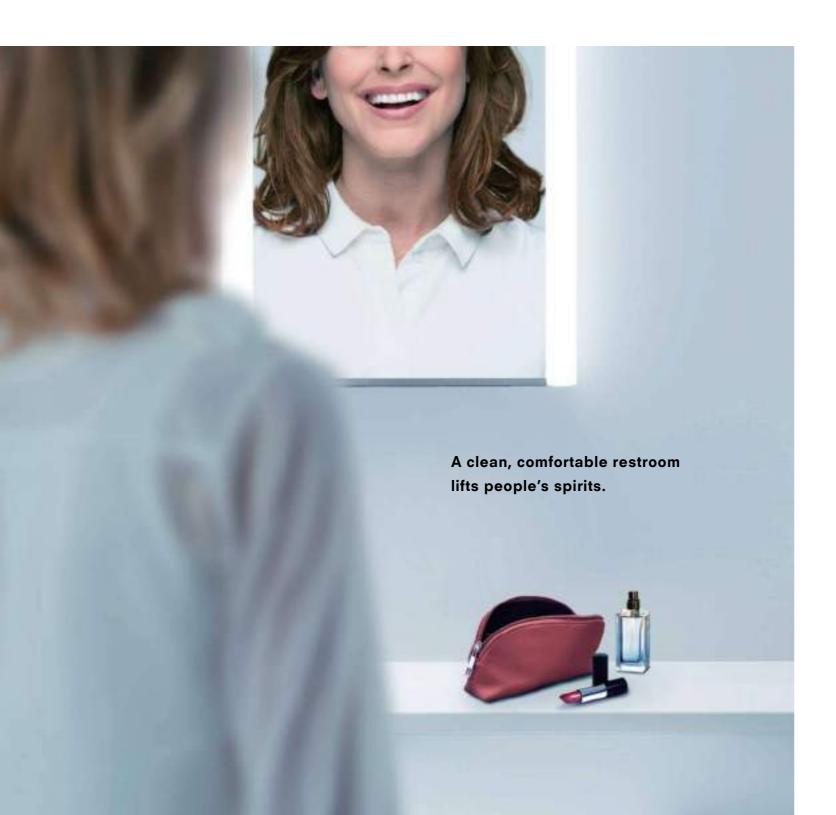

CLEAN SYNERGY combines the sanitary functions of a TOTO toilet and WASHLET to keep the toilet fresh and clean.

EWATER+

COMFORT

From a place where people just "go to the toilet" to a place where people can freshen up and relax.

One part of a restroom has recently undergone significant change: the washing area. Previously there may have been just a sink to wash your hands, but this area has now evolved into a place where people can place their bag and freshen up, or even sit down and take time to retouch their makeup. Keeping pace with this trend, TOTO offers not only fixtures, but also innovative proposals for comfortable, multifunctional lavatory spaces.

A growing number of public restrooms have an area separated from the washing area where users can relax, freshen up and even touch up their makeup, reducing the need to crowd around the washbasins.

FITTINGS & SHOWERS

FOILETS

UNIVERSAL DESIGN

Designing fixtures easy for everyone to use.

Light flush

Standardized symbols for toilet operation panel

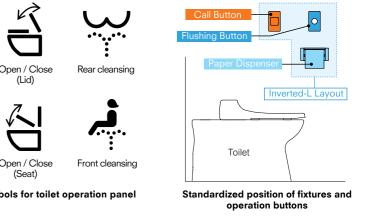

dispenser on the walls of public restrooms (ISO 19026).

As a leading manufacturer of plumbing fixtures, TOTO strives to develop products featuring universal design and standardized specs.

Public restrooms are used by many different people. TOTO places great importance on universal design to ensure that everyone can use restrooms with comfort and ease. TOTO's product development incorporates customer feedback and extensive study results on user needs and how products are used. Human body movement and physical effort are also scientifically analyzed. TOTO collaborates with experts to evaluate the ease of use of different fixtures and space layouts, and works to promote uniform industry standards. TOTO will continue to prioritize universal design to make restrooms easy to use for as many people as possible.

TOTO was influential in the establishment of standardized graphical symbols for toilet operation units (ISO 7000) and standardization of accessible design, including the shape and color of the flushing and call buttons and their arrangement together with the paper

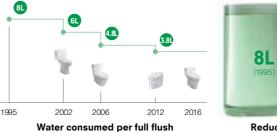

EARTH-FRIENDLY

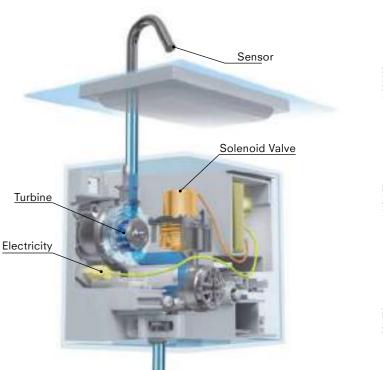

Features for enhanced water-saving and energy-saving without sacrificing comfort or convenience.

Reducing CO2 emissions has become an issue of global importance, but how can public restrooms be made more earth-friendly? The answer is to minimize the amounts of water and electricity used. As a leading manufacturer of plumbing fixtures, TOTO has been working to reduce water and electricity consumption by our fixtures for many years. Today, TOTO's water-saving toilets use just 3.8 liters of water per flush, the world's highest standard of water-saving performance and about half the amount of water used by toilets in 1995. TOTO continues to develop fixtures that conserve water and electricity while maintaining comfort and convenience. One example is ECOPOWER touchless faucets, which use the flow water to generate electricity and ECO CAP, which mixes air with water so users can thoroughly wash their hands while using less water.

Steadily reducing toilet water consumption

Reduced from 8 to 3.8 liters

This ECOPOWER touchless faucet uses the flowing water to generate the electricity it needs to operate. There is no need for electrical wiring, making installation and renovation easier

ECO CAP

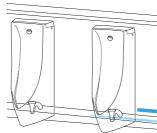

SERVICEABILITY

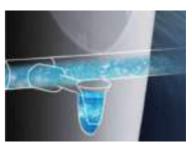

Clean and sanitary even in places that can't be seen. Public restrooms that are easier to clean and service.

It is important to maintain a high level of comfort and convenience when considering ways to reduce the amount of work needed to clean and service a restroom. TOTO has developed a variety of innovations and technologies for keeping restrooms clean and sanitary and for suppressing the accumulation of waste, not only in visible areas but also in places hidden from sight such as the inside of pipes. Urinals are periodically flushed automatically when not in use, such as at night to keep drainpipes clean. Though innovations such as a compact urinal trap that efficiently replaces the water after use, and EWATER+ for preventing stains and odors, restrooms are kept sanitary while effectively conserving water.

Interval Flushing System Automatically flushing after each use, the urinal also flushes periodically to prevent the buildup of urine scale in the drainpipe.

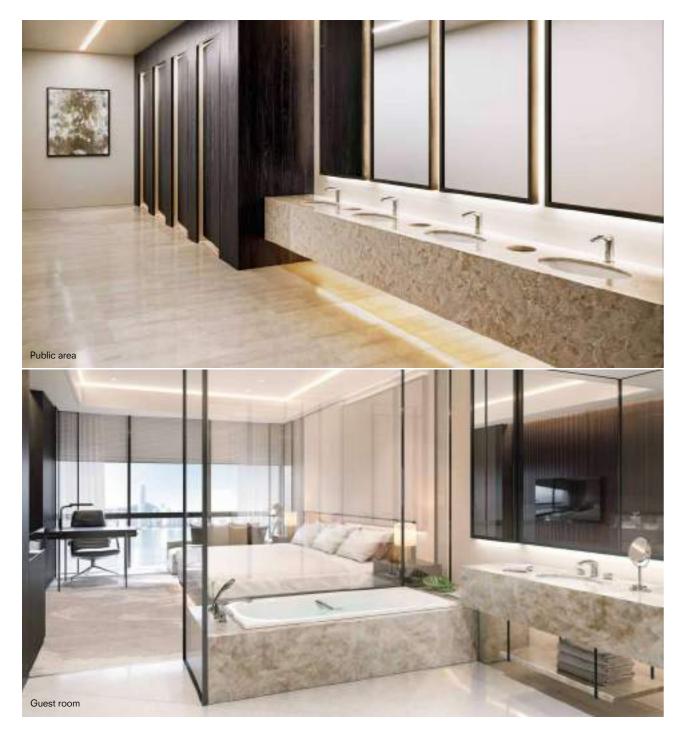

Vastewater containing a hign volume of urine ains in the drainpipe even after flushing with each use.

EWATER+

Unifying various hotel spaces with a discerning design.

Faucet fittings in public areas and guest rooms can be unified with the same design sense.* From public to private spaces, you can use just the right faucet to coordinate spaces in the hotel. *Compatible series: GE, GC , GM

GM_{series}

A graceful arch design echoing traditional architecture presents an extraordinary space.

TOUCHLESS SOAP DISPENSER

Touchless Soap Dispenser

Functions and durability that prevent malfunction and troubles due to misuse or vandalism.

A wide variety of people utilize public spaces, from small children to adults, and misuse or vandalism can lead to malfunctions and other troubles. TOTO's automatic soap dispensers have functions and durability to minimize breakdowns and troubles, regardless of the circumstances.

A spout structure designed for strength, difficult to break.

Assuming that strong forces might be applied to the spout tip, we inserted a pipe within the base for increased strength. Even if the spout is damaged, this prevents cracking and breaking at the base.

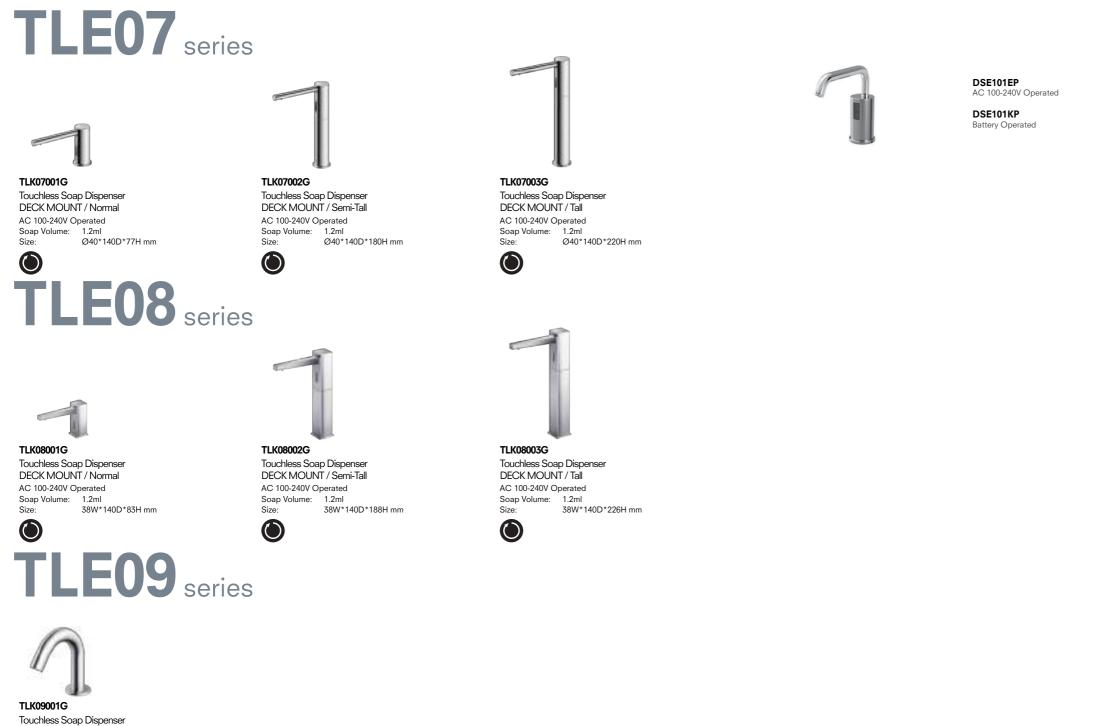

Designs that prevent liquid soap from getting on people.

Children sometimes play with automatic soap dispensers, and even adults may press against the spout, having confused them with push-type dispensers. We therefore designed our spouts with a groove so that when liquid soap is dispensed, if the tip is covered soap will squirt out toward the back, not in a way that will cause it to spray on the user

TOUCHLESS SOAP DISPENSERS
